Ans

Given:

+61

+27

Sol

first we convert +61 & +27 to binary.

D

B

+61 = 0111101

+27 = 0011011

+88 = 1011000

(88)₁₀ = (1011000)₂

Ans

Now

+27

-61

Now first we convert to binary then we take 2's complement of 61.

D

B

+27 = 0011011

-61 = 0111101

first we take 2's complement of 61.

2's complement = 1000010
+1

// // = 1000011

Now

D

B

+27 = 0011011

-61 = 1000011

D		B
+27	=	0011011
-61	=	1000011
-34	=	1011110

Now take 2's Complement of
 1011110

2's Complement of 1011110 = 0100001

+1

0100010

D		B
-34	=	0100010 Ans

Now

-27
 -61

In binary,

-27 = 0011011

-61 = 0111101

2's Complement of 61 = 1000011

2's " " 27 = 1100100

+1

2's " " 27 = 1100101

Given -18

(ii) 1's Complement

Sub	D	B
-18	=	1 0 0 1 0

1's Complement of 18 = 01101

* At least 4 bits need to represent in 1's Complement

(ii) 2's Complement

for

2's Complement of 18 = 01101

1110
