University of engineering & technology Peshawar

COMPUTER PROGRAMMING -LAB

Lab report # 11

Spring 2020

Submitted by: Ashfaq Ahmad

Section: B

Reg No: 19PWCSE1795

Semester: 2nd

"On my honor, as a student of University of Engineering and Technology Peshawar, I have neither given nor received unauthorized assistance on this academic work"

Student signa	ature:
---------------	--------

Submitted to: **Eng: Abdullah**

Department Of Computer System Engineering

C++ Program with CLASS

Task no 1:

Make a C++ Program that will have a Class of your choosing. You can pick your own concept it doesn't need to be a specific Class (for example we in lab we made a class about rectangle choose anything like that).

Your class must contain the following:

- Constructor
- Member function
- Data members
- Destructor

> A c++ program having class "circle" to find its area...

Source code:

```
aaaa.cpp
 1
      #include<iostream>
      using namespace std;
  3
  4
      class circle
  5 🖵 {
              float radius, area; //data members
  6
  7
          public:
                                 //constructor
  8
              circle()
  9 🖃
              cout<<"\n Enter the value of Radius : ";
 10
 11
              cin>>radius;
 12
 13
              void calculate();
                                //member function
              void display();
 14
                                //member function
 15
              ~circle()
                                 //destructor
 16
                  cout<<"\n\nAshfaq Ahmad"<<"\nreg no: 19pwcse1795";</pre>
 17
 18
 19 [ };
 20
     inline void circle :: calculate() //accessing data members of a class circle
 21 🖵 {
 22 7
             area = 3.14 * radius * radius;
     inline void circle :: display()
 24
 25 🗏 {
 26
              cout<<"\n Area of Circle : "<<area;
 27 L
 28 int main() //main function of program
